than 20,000 lives were lost, and damages were estimated at
\$5 billion. There is a strong correlation between the spatial
distribution of damage associated with this and previous
events and the location of lacustrine deposits. Hence, the
role of these deposits in the performance of superstructures
is un-disputed. The strain-dependent shear modulus and

damping ratio play an important role in

Abstract - King Abdullah University of Science and Technology

Indeed, the critical relevance of energy in our lives is readily demonstrated by the correlation between quality of life indicators and power consumption. Population growth is also correlated to energy consumption: the lower the power consumption, the higher the population growth rate. If we consider the population growth and the increasing power consumption per person in most countries, then
