The metadata can be seen as a detailed information section
with data about variables, objects, types, security settings
etc. One of the most important section of metadata are
tables with definition of classes in assembly, table with
methods and to this table is related table with method
arguments (see diagram bellow).

**XForms 2.0 - W3C XForms Group Wiki (Public) -
w3.org**

XForms is an XML markup for a new generation of forms
and form-like applications on the Web. XForms is not a
free-standing document type, but is integrated into other
markup languages, such as , or . An XForms-based
application gathers and processes data using an
architecture that separates presentation, purpose and
content.
