Global Environmental Issues by Frances Harris - Goodreads

Meeting the needs of upper level students, this book treats global environmental problems as complex issues with a network of human and biophysical causes. Each chapter interlinks human demands on the Earth's resources to natural biophysical change - not simply a 'cause and effect' treatment of

Global environmental issues by Harris, Frances (Frances M. A.)

Global Environmental Issues views global environmental problems as complex issues with a network of causes, influenced by a range of actors with differing priorities. In addition to discussing the main biophysical causes, the book will illustrate how socio-economic and political factors determine why and how people use land, resources and technology, and how this in turn affects natural
