From 1960 until 1990 theoreticians and experimentalists worked together to probe deeper and deeper into the basic structure of reality, moving closer and closer to an understanding of the ultimate building blocks from which everything in the Universe is made. Gerard 't Hooft was closely involved in many of the advances in the

development of the subject. In this book he gives a personal account of the process by which physicists came to understand the structure of matter, and to speculate on
