The first part of the book is concerned with nonsmooth

differential calculus containing necessary tools for nonsmooth optimization. The second part is devoted to the methods of nonsmooth optimization and their development. A proximal bundle method for nonsmooth nonconvex optimization subject to nonsmooth constraints is constructed. In the last part nonsmooth optimization is applied to problems.

Optimization Problem Types - Nonsmooth Optimization | solver

Nonsmooth Optimization (NSP) The most difficult type of optimization problem to solve is a nonsmooth problem (NSP). Such a problem normally is, or must be assumed to be non-convex.

An Effective Nonsmooth Optimization Algorithm for Locally ...

To construct an effective minimization algorithm for locally Lipschitz functions, we show how to compute a descent direction satisfying Armijo's condition.

Marko M. Makela | Professor - ResearchGate

The aim of this paper is to introduce a new proximal double bundle method for unconstrained nonsmooth optimization, where the objective function is presented as a difference of two convex (DC)
